

LFM-16C Modular Counter

The LFM-16C pharmacy counting machine continues to meet the needs of our customers with count accuracy, quick change over, and simple operation.

What is most appealing is that no expensive change parts are required to run this machine.

As with all our machines the PP-12MC is made by Pharmapack.

The LFM-16C was designed to be our most versatile pharma filling machine. It is accurate, simple to operate, and engineered for quick changeovers. Products of any kind can be counted including clear soft gels and veterinary products. There are many tray options available for the tablet counting and filling machine.

Features

1. Increasing the vibration speed up to 50% by the new 8-track vibrator, the counting speed of each track increases 50%.
2. New 8-track structure speed match old 12-track, speed up to 12000 tablets /min.
3. New servo control with self-detection to replace the old cylinder, the flapper free of dust effect, more stable, longer life-span, lower maintenance cost.

Advantages

1. Multiple modular design concepts, from 1 to N, can better meet different customer requirements.
2. Each modular is independent, and the flapper window is visible that easy for cleaning. It's also convenient for maintenance.
3. Less track, more compact, less space to occupy.
4. Applicable to pills, tablets, capsules, and other relevant products.

Technical Parameter

Model	LFM-16C
Max.Speed	12000pcs/min
Dosage/btl	1~1,000pcs
Tablet size	Φ3-Φ20mm; Applicable to tablets, capsule, caplets, soft gels, transparent soft capsules etc.
Bottle size	Dia: 20-80mm, Height: 40-240mm
Power supply	AC220V, 50/60Hz
Power absorption	Approx. 6.0kw
Air pressure	4.9-7bar
Air consumption	Approx.200L/min
Dimension (L×W×H)	Approx.1200mm×2150mm×2150mm
Weight	Approx.1500kg
