

ZLS-300 Refillable Syringes Filling and Closing Machine

Syringe filling and assembling line function as unscrambling syringes and putters, filling material, plunging putter, labeling, weighing etc.

Product Description

- To fill glass refillable syringes and insert stoppers into syringe barrels.
- Syringe filling and assembling line function as unscrambling syringes and putters, filling material, plunging putter, labeling, weighing etc.
- Servo motion control system is applicable to call formula parameters easier and save parameters' setup time.
- Magnetic cup holder is used to replace different size of syringe conveniently.
- Centrifugal unscrambling can reduce the noise when machine are running.

Main technical parameter:

- Filling volume(ml): 0-20ml
- Filling accuracy: $\leq \pm 3\%$
- Suitable syringes(ml): 0.5ml, 1ml, 2.25ml, 3ml, 5ml, 10ml, 20ml
- Theoretical output: 20-25pc/min (1200-1500pc/hour)
- Motor power: 1.1Kw
- Overall dimension(mm): 1560*800*1800mm(L*W*H)
- Machine weight(kg): 650
