

Three-Dimensional Transparent Film Packaging Machine BT-2000B

This versatile machine is designed for three-dimensional packaging of various types of cardboard boxes by using environmentally friendly OPP or BOPP film. It's capable of packaging a wide variety of sizes and applications from pharmaceuticals, food, cosmetics, tea, nutraceuticals, cigarettes, and playing cards to DVDs.

Introduction

This machine is a mechanical linkage structure that utilizes an array of cams to drive the connecting rods and working parts to perform operations. Based on the principle of skin packaging, this machine is designed with a multi-function display, an inverter, and a PLC to carry out the functions such as heat sealing, forming, automatic temperature control, and emergency stop.

Feature

- It features an excellent seal against both moisture and dust.
- A tear tape is used for easy opening.
- A tear tape with patterns or trademarks is used for anti-counterfeiting.
- The packaging can help shape a stronger product culture, increase the added value of your product, and take your product to the next level.

Specifications

Model	BT-2000B
Production Capacity	40-60 packs/min
Packaging Size Range	(L)40-160mm(W)20-100mm(H)10-50mm
Power Supply	220V 50-60Hz
Motor Power	0.75KW
Electric Heating	3.7KW
Dimensions	2400mm*800mm*1560mm
Total Weight	880kg
