

Automatic Aligning and Rack Loading Machine ARL-605

The "ARL-605 Automatic Aligning and Rack Loading Machine" is designed with an intuitive human-machine interface and easily adjustable parameter settings. This machine enhances production line efficiency, requires minimal training to operate, and accurately accomplishes repetitive work. ANKO offers two types of trollies for different factory configurations. If abnormalities are detected, an emergency shutdown and a siren will be activated to minimize production losses. Utilizing fast-moving, precise, and efficient automated equipment is the key to successful food manufacturing.

Features:

- ANKO offers a selection of baking sheets, steaming trays, metal trays, and stainless steel racks with different dimension, to best suit your production specifications.
- The machine precisely aligns food products on the trays, ensuring each piece is perfectly formed. Food factories utilize automated production to reduce human contact with food to improve overall hygiene and food safety.
- The interface is designed to enable precise food placements and has nine sets of parameter memory settings.
- When trays are missing, the machine will automatically stop and activate a warning siren.

Technical Parameters:

- Dimensions: 4,300 (L) x 2,150 (W) x 1,800 (H) mm
- Power: 3.35 kW
- Weight (net): 485 kg
- Compatible with AS-610 Gas Steamer
- Steaming tray size: 605 (L) x 605 (W) mm
- Production capacity is for reference only. It'll change according to different product specifications and recipes. Specifications are subject to change without notice.
