

J-120S Manual Feeding Type Cartoning Machine /Cartoner

Performance characteristics:

1. The main control components of the whole equipment are Siemens brand.
2. Inverter speed regulation, using PLC automatic control system.
3. Adopt a 7.0-inch 256-color human-machine interface operating system, automatically display performance parameters such as box speed and quantity, and display the cause of the fault and operation and maintenance methods.
4. Multi-specification adjustment can be realized within the specified range in the equipment on the same platform.
5. Manual and automatic conversion functions.
6. Complete the folding box function of the manual synchronously. (Optional)
7. Equipped with an automatic detection system, the online culling function of the missing book paper box is performed. (Optional)
8. Print the three-row batch number synchronously on the medicine box. (Optional)
9. The box sealing method is two kinds of locking type and viscose type. (optional)

Technical Parameters

1. Box speed: 40~120 boxes/min
2. Adaptation range: carton length × width × height (60~150) × (30~90) × (15~45)
3. Size of the manual: length × width (80~250) × (90~180)
4. Power supply: 380V 50Hz
5. Main motor power: 1.5kW
6. Compressed air pressure: 0.6MPa
7. Air consumption of compressed air: 60~90L/min
8. Equipment weight: 1100kg

Note: Other models can be consulted for other size carton sizes
