

## *CM-W Packaging Machine With Multihead Weigher*

CM-W Packaging Machine with Multihead Weigher is preferred for very precise packaging of granular products. Let's examine the properties of CM-W Multi Electronic Weighing Machine.

CM-W Multi Electronic Weighing Machine is suitable for high precision packaging of grain products. The balance is controlled by a microprocessor independent of the packaging machine. There is a touch screen independent of the balance packaging machine and it is controlled via this screen. All the surfaces that come into contact with the product are AISI 304 stainless steel and are completely suitable for foods. Easy to change collar set allows quick change of package types.

CM-W Packaging Machine with Multihead Weigher with easy adjustable speckle sensor enables precise package length adjustment. The automatic stop operation due to the continuously controlled printer error prevents unprinted and incorrect printing. It is equipped with Servo motor driven film sliding unit. Pneumatic driven horizontal jaw pressing and cutting unit. Depending on the type of packaging, cold or hot bonding techniques can be applied. Film tension is continuously controlled. It provides coil centering with precise edge control. This packaging machine is strictly assembled in accordance with CE standards. The CM-W Multi Electronic Weighing Packaging Machine has become much more convenient with the option to use it in different languages and its easy-to-use touch screen.

### **Optional Equipment:**

- Nitrogen filling unit
- Screw feeding unit
- Output Conveyor
- Vacuum belt
- Eurohole / Strap Hole
- Printer with barcode and date writing

**Technical Specifications:**

Width	3070mm
Length	2700mm
Height	3400mm
Weight	1500kg
Production Speed (Number/Min)	140
Package Length	30mm - 300mm
Package Width	65mm -240mm
Film Coil Diameter	300mm
Film Coil Width	140mm - 502mm
Power Consumption	7.5 Kw
Operating Voltage	380V 3 Phase 50Hz
Air Consumption	325 Lt/Dakika - Minute
