

## *GPA-30 E-commerce Carton Sealer*

The e-commerce carton sealer is a machine specially designed for the e-commerce industry to quickly seal small cartons, with a sealing speed of 20 cartons/min. It is driven by belts on both sides, the polygonal design device stabilizes the tape head base, automatically seals the bottom and top of the carton, supports the sealing of carton size of 1-12, prevents bad packaging effects such as warping cartons and tape seal crooked etc, and the sealing effect is smooth and beautiful. At the same time, the width and height can be adjusted manually according to the specifications of the carton, and the operation is simple and convenient. Not only can it solve the problem of a large number of packages and slow packaging in the peak season of e-commerce, but also does not require any maintenance, and can be used after power on.

### **Features**

- **Suitable for small cartons:** It specially designed for the e-commerce industry, supports of carton size 1-12;
- **Simple adjustment :** Width and height can be adjusted manually according to the carton specifications, and the operation is simple and convenient;
- **More safety:** The machine is equipped with safety protection measures, and the operation is more assured;
- **Quick Load Tape Design:** Change design of the traditional tape head base, just need to grasp the tape arm, you can easily remove the tape head, and the tape can be quickly installed in 5 seconds, the operation is simple and convenient;
- **Featured configuration, stable and durable:** Selected powerful motor to ensure stable, keep the whole machine transporting smooth and fast, accessories steable and druable;
- **Sealing effect:** Adhesive tape to the carton, no skew, no bubbles, beautiful a

Specifications

MODEL	GPA-30
Packing speed	22m/min
Carton size	130mm-∞∞mm×W80-300mm×H90-400mm
Power supply	220V 50Hz
Applicable Tape	30-50mm
Table Height	600-850mm
Machine Dimension	L750×W636×H1500
Machine weight	90kg
