

Horizontal Flow Bread Packing Machine ZW-500S

It suitable for packing all kinds of solid and regular products, such as moon-cake, bread, instant noodle, biscuit, sweet, medicine, hardware and electronics, daily necessities, and big bag size for secondary packaging.

Main characteristics & Structure features

1. The operation of the whole machine is completed by the motion controller, with a large LCD screen, and the working state of the machine is clear at a glance.
2. Transmission servo mechanism, sealing and cutting position is accurate, stop position, printing position can be set arbitrarily; Simple mechanical structure, convenient debugging, intuitive; Wide range of packaging, to adapt to a variety of product specifications.
3. The mechanism layout in line with human engineering mechanics can facilitate and quickly clean up, maintain, maintain and overhaul the machine, reduce the labor intensity of the operator and effectively improve the production efficiency.

Specification

Model:	ZW-500S(single-pole)	ZW-500S(double -pole)
Bagging size range	L 80-500mm	80-500mm
	w 30-160mm	30-160mm
	H 5-60mm	5-50mm
Packing speed	35-200bags/min	35-300bags/min
Packing film width	80-370mm	80-370mm
Power supply	220V 50HZ	220V 50HZ
Total power	5.45kw	6.85kw
Machine weight	540kg	550kg
Outside dimensions	4000*950*1600mm	4000*950*1600mm
