

DPR 320G Tropical (AL/PL/AL) Blister Packaging Machine

DPR 320G Tropical (AL/PL/AL) Blister packaging machine is inert on the basis of national-level key new products and also adopted three domestic patent No.01239101.8,01239100. Moreover it won the third-class award of scientific and technological progress of Ruian city. These not only improve the technical level and capability, but also make the packaging farther perfect.

The machine is equipped with double servo traction, double PVC stent, PVC cut device, imported camera detection system, aluminum forming station adopts the pl-up forming method, sharp without side blanking mechanism, vacuum suction plate, automatic rejection and sorting convey device, with cartoning machine ink age automatic production line, Optional track-type special automatic feeder, cursor device, etc.

Technical parameter

Productivity	40000-100000 Pieces/h
Cutting frequency	5-30 (Steplessly adjustable)Time/min
Travel adjusting range	40-130mm
Max. Of forming area and depth of PVC	300 x 120 x 14mm
Max of topic Aluminum forming area and depth	280 x 120 x 15mm
Heating plate power	2 (upper) 、 2(lower)KW
Hot-sealing power of alum-Plastic	3kw
Hot-sealing power of tropical Aluminum	7kw
Power of main motor	3.2kw
Capacity of air compressor	≥0.2m ³ /min
Size of wrapper(width)	PVCPlastic320mm、 Alum.foil PTP320mm、 Tropical Aluminum320mm
Weight	4000kg
Overall size	6217 x 839 x 1660mm
Size of encasement	3122 x 839 x 1660mm 、 3095 x 839 x 1660mm
