

LGYS-3000 Induction Sealing Machine

Products Description

1. Wiring and layout of automatic induction sealer meets the requirements, the wiring board has insulating protection against electric shock, safer design
2. Sensors on both sides of the cooling hollow design, so that the body quickly heat to maintain sustained and stable work
3. Local cooling water must be pure water or distilled water, can not use tap water or no purification of ordinary water to prevent the production of scale, plug the water pipe to damage the equipment
4. The design of the casters makes it easy to move the entire sensor

Product effect

- Applicable for plastic bottles (PP, PET, PE, PS, PVC) & glass container.
- Specialized designed for hand held cap sealing.
- Extremely Simple to Use
- Small, portable, convenient to move
- Optimal use for small to medium productions or as backup to larger continuous systems
- Heating speed is 20-30 times/min
- Not applicable of capping operation of metal & non-threaded pressing cap

Product Specification

Model	LGYS-3000 Induction Sealing Machine
sealing diameter	$\phi 20 \sim \phi 150\text{mm}$
Sealing Height	20~400mm
Sealing Speed	5~18m/min
Water cooling mode	Water cooling
Voltage	AC220V $\pm 10\%$,50Hz
Power	3KW
Machine size	680×970×1450mm
