

## *SH-XG445S Liquid Soap Lotion Bottles Plastic Dispenser Pump Caps Bottle Cap Feeding Placing Machine With Bowl Sorting Machine*

### **Main Feature**

- ▶ Equipped with a vibratory bowls sorting mechanism to ensure that pump caps are correctly oriented before being placed on bottles
- ▶ Capable of handling more of pump caps per minute, this can reduce manual labor and operational time.
- ▶ Touchscreen control panels for easy operation and monitoring.
- ▶ Constructed with robust materials to withstand continuous operation.
- ▶ Can be integrated into existing production lines and synchronized with other machinery like filling machines, capping machines, and labeling systems.

### **Parameter**

- Voltage: 110/220V
- Power: 1.5KW
- Capacity: 5-25 Bottle/Min(based on bottle and cap size)
- Air pressure: 0.5-0.8Mpa
- Suitable bottles: Customize according to sample
- Cap feeding way: Pneumatic fetch
- Machine size: About 3000\*1300\*2100mm(L\*W\*H)
- Packaging size: About 1090\*640\*1960mm(machine)+About 1060\*970\*1570mm(Vibratory bowl sorter)
- Packaging weight: About 210kg(machine)+About 106kg(Vibratory bowl sorter)
