

SED-120SP Automatic Plastic Ampoule Filling Sealing Liquid Filling Machine

SP series automatic cup filling and sealing machine is suitable for filling and sealing various liquid and solid materials, such as: jelly yogurt, juice, condiments, sauces, soy milk, noodles and powdered materials and etc.

This machine is a full automatic production line with such processes as automatic cup-loading, filling, photoelectric pattern proofreading, heat sealing, cutting, leftover film collecting and cup discharging.

We can also add there filling, cap covering, air purifying, date printing, Cup discharging and conveying, PLC control system.

Advantages

- This machine is a full automatic production line with such processes as automatic cup-loading→filling→photoelectric pattern proofreading→heat sealing→cutting→leftover film collecting → cup discharging.
- The machine is suitable for filling and sealing various liquid and solid material
- The machine can also add the other functions according to the client's requirements, such as pulp filling,CIP cleaning,automatic level control,air blowing and dust-sucking,bacuuming and nitrogen filling,cap covering,air purifying,date printing , cup discharging and conveying,PLC control system.
- The machine is integrated with pneumatic, mechanical drive and PLC control.
- The filling head will stop filling if no pouches available.

- The touch screen can be set with two language version.

Product Parameters

Model	SED-120SP
Max Forming Depth	12mm
Speed	0-25 cuttings/min
Material	PVC/PE (0.2-0.4)*120mm
Filling volume	2-20ml
Total Power	3.5kw
Power Supply	380V 50HZ(Depends on your requirement)
Weight	300kgs
Overall Dimension	1300*1100*750mm
