

SED-200SBF-I Automatic Four-side Packing Machine

The whole machine adopts integrated design of light, electricity and gas, advanced technology, and is the most advanced four-side sealing packaging equipment in China. This machine is a paper a plastic composite model. Feeder can be configured.

Feature

1. PLC programmable control, servo motor drive, so that the operation of the whole machine programmed.
2. Touch screen display, main machine speed, bag length length, cutting knife, heat sealing and feeding time, output will be displayed on the screen.
3. Graphic and text alignment: Imported photoelectric eye tracking color label, accurate graphic and text alignment.
4. Automatic temperature control. Two groups of temperature controllers are used to automatically control the temperature of the heat sealing parts, so as to improve the sealing quality.

Product Parameters

Model	SED-200SBF-I
Speed	80-200 bags/min
Packing Speed	Four Side Sealing
Product Size	(L)100-300mm(W)80-150mm
Film Width	400-800mm
Film Roll Inner Diameter	Φ70-75mm
Film Material	PE/OPP PE/PET Paper
Power	8.5KW
Voltage	380kw 50HZ
Weight	2180kgs
Size	4500x1000x1800mm
