

SLF3-50 3-Side-Seal Powder Sachet Packing Machine

Auger dosing and automatic forming, filling, sealing and cutting for powder sachets with a three-side seal. A compact production format for a defined powder and dose.

Three-side-seal powder sachets

The powder is metered into a formed sachet before sealing and cutting. Specify the sachet artwork, powder behavior and opening style together.

What matters on the SLF3-50

Auger powder dosing

A screw-type loading and auger filling system meters the powder. Product flow and bulk density determine the final setup.

Choice of opening detail

Straight cutting and an easy-tear notch are listed. Confirm notch position against the seal area and printed artwork.

Integrated packaging cycle

Forming, filling, sealing and cutting are completed on one machine. Alarm functions assist the operator during production.

Specifications

Model	SLF3-50
Packing Material	Powder
Dosing Range	3-50 g
Bag Type	3-Sides Seal
Cut Type	Straight Cut; Easy Tear Notch
Packing Speed	30-35 BPM(As Per Powder Features)
Electrical supply / load	AC220 V 1Phase 50-60 Hz 1.5 kW
Net Weight	350 kg
Single Machine Size	L: 625 mm W: 750 mm H:1500 mm
