

## ***Multi Material Granule Packing Machine DXD-150C***

### **Characteristics:**

1. The fully automatic multi material granule packing machine comes with PLC programmable control and an English and Chinese display screen, making it easy to operate and maintain. It is easy to adjust.
2. A photoelectric tracking system and two-way compensate function of the granule packer ensure correct and accurate double-face printing and counting.
3. The granule packer shell, made of full stainless steel, is highly corrosion proof, easy to clean, and meets GMP requirements.
4. The multi material granule packing machine uses measuring cups for granule feeding, screw type powder feeding and piston pump for measuring in liquid feeding.
5. For cutting, a flat cutting, fracture line cutting or saw-tooth cutting can be chosen. The ribbon coding machine is optional.

### **Usage:**

The multi material granule packing machine is used for packing granule materials, powder materials or liquid materials such as pellets sugar, soup, oatmeal, seeds, coffee, honey, cream, ketchup, detergent powder, milk power, and instant drink, etc. into small bags. It is used in the pharmacy, food, and agriculture industries.

**Main Technological Parameters:**

<b>Item / Model</b>	<b>DXD-150C</b>
Pouch length	80-180mm
Pouch width	70-120mm (if you change width, please change bag mold)
Packing speed	20-50 bags/min
Measuring range	10-100ml
Cutting	Flat cutting, fracture line cutting or saw-tooth cutting
Applicable film	PET/AL/PE, PET/PE, NY/AL/PE, NY/PE/aluminize/complex film
Electric source	380V 50Hz (as per customer's request)
Total power	1.5kw
G.W.	400 Kg
Package size	1220*1000*1900mm (L×W×H)
