

Automatic 8 Heads Liquid Filling & Capping All-In-One Machine GSX500(1000)S

Liquid filling and capping are set on one machine stand.

Adjustment of filling volume is set on touch-screen without any tools.

Adjustment of filling volume is controlled by Japanese ankawa servo motor. Each volumetric cylinder can be minim adjusted individually. High accuracy and synchronized changeable capping lock heads, suitable for different caps total six detecting points; Working status is displayed on touch-screen. Intelligent operation.

Feature:

1. Liquid filling and capping are set on one machine stand.
2. Touch screen input filling quantity, weighing automatic feedback system, a key do adjust the filling quantity, convenient and quick.
3. Adjustment of filling volume is controlled by original Japanese ANKAWA servo motor. Each volumetric cylinder can be tuned individually. High accuracy and synchronized.
4. Changeable capping lock heads, suitable for different caps.

Parameters:

Model	GSX500S	GSX1000S
Filling Volume	50-500ml	100-1000ml
Number of Filling Head	8 Sets	6 Sets
Capacity	50-56 B/min	26-30 B/min
Filling Accuracy	0.5%	0.5%
Compressed Air	5-6Kg/cm 2 0.2m 3 /min	5-6Kg/cm 2 0.2m 3 /min
Supply Power	3P 380V/220V 50-60Hz 2500W	3P 380V/220V 50-60Hz 3000W
Dimension(L×W×H)	3800×1100×1800mm	3800×1100×1800mm
Net Weight	850Kg	950Kg
