

Dual Heads Automatic Auger Filler Filling Machine / VTOPS-PDH

Dual heads automatic auger filler is a high-end auger filler developed by Vtops Machinery. This machine equipped with two auger-fillers for different functions: high-speed filling, or high-precision filling, or filling-by-vibration, or filling-by-weighing. It is ideal for high-end customers with special needs.

Functions:

- High-speed Filling: Filling (1st filling head) + Filling (2st filling head)
- High-precision Filling: Fill-by-Weight (1st filling head) + Fill-by-Weight (2st filling head)
- Filling-by-Vibration: Fill-by-Vibration (1st filling head) + Fill-by-Vibration (2st filling head)
- Filling-by-Weighing: Filling (1st filling head) + Fill-Weighing (2st filling head)

Features:

1. The machine designed in accordance with GMP standards, comply with national food hygiene requirements.
2. LCD touch screen with Chinese and English double languages.
3. Filling weight is adjustable at any time. Working status is changeable at any time.
4. Filling motors are servo motor. Bigger torque, higher precision, higher speed. Motor speed is adjustable, and good stability and other advantages.
5. Stirring part uses Taiwan brand maintenance-free speed-reducer: With low noise, long life, lifelong maintenance-free characteristics.
6. Totally closed with dustproof structure. Columns are food grade 304 stainless steel. Transparent doors are plexiglass with 1 cm thick. The operator is visible the working status of dual heads auger filler machine through transparent plexiglass.

7. The filling outlet opening equipped with a Dust Sucking Device, to protect workshop environment.

8. Split Hopper is easy to clean, and easy to replace auger part tube for different filling weight.

Technical Parameters:

- Model: VTOPS-PDH
- Brand: VTOPS
- Filling Weight: 5g-2500g
- Filled Error: $\leq \pm 1\%$
- Measurement Method: Double Auger Fillers
- Filling Speed: 0-60 fills/min
- Filling Motor: Servo Motor
- Indexing Control: Rotary Style Star-wheel
- Plexiglass Room: Yes
- Auger Height Adjustable: Yes [2]
- Monitorable Hopper: Yes [2]
- Easy Clean Hopper: Yes [2]
- Hopper Volume: 50Liters + 50Liters, Or 50Liters + 30Liters
- Dust Suck Device: Yes
- Contact Materials: SUS 304
- Machine Weight: 850 Kg
- Power: 3P 380V 3.5Kw
- Dimensions: 330*150*236cm
