

## Automatic Rotary Bag Sachet Packing Machine FJ-210GD/300GD/350GD

### MAJOR CHARACTERISTICS

1. Mechanical arm bag handling - printing - bag opening - filling - jolt ramming - air pressed - sealing - shaping - embossing - outputting
2. PLC and Touch screen control panels are used to control the machine automatically. It is easy to operate and no environment pollution.
3. The mainframe is adjusted by imported frequency conversion.
4. The packaging bags are good-looking, which has been printed and heat-sealed for twice.
5. The machine is designed with shaping service position ,so the mouth of the bag is smooth after sealing.
6. The part which contacts with filling materials is made of stainless steel. It is clean, anti-corrosion and stable.
7. According to the requirement of the filling materials, automatic weighing machine, screw filling machine is optional. Intelligent compound balance and other machines are optional for a filling line.

### TECHNICAL PARAMETERS:

Item	Performance
Machine overall dimension (LxWxH)	3000mm*2600mm*2200mm
Machine weight	1000KG
Power supply	380V; 50/60HZ
Power	4KW/5KW/5.5KW
Bag size (L*W)	210GD :100*150-210*320mm

	300GD: 200*180-300*450mm
	350GD: 250*230mm-350*500mm
Weighing range	210GD :50-500g
	300GD: 500g-2000g
	350GD: 1kg-5kg
Packing speed	210GD : 40bags/minute
	300GD: 10-18bags/minute
	350GD: 10-15bags/minute
Air source	0.6MPa clean and compressed air
Air consumption	40L/min
Suitable bag type	Three sides bag, four sides bags, stand pouch bag
