

Vial Filler and Capper

This vial filler and capper is specially designed for filling, capping and sealing 1-50ml penicillin vials.

Both plates and hoppers are used for feeding vials. And it has two filling heads. Air cylinder is used for capping.

Features:

1. Combination of filling, capping and sealing.
2. Simple structure, reliable performance, even pressure, and good sealing capacity.
3. Controlled by computer, this vial filler and capper is easy to operate.
4. Easy to maintain, and one-year warranty period.

Main Parameters:

Production Capacity	2400~3600 bottle/hour
Bottle Size	1ml-50ml vials
Package Accuracy	+ - 1%
Rate of Sealing	≥99%
Plug Rate	≥99%
Cover Rate	≥99%
Electric Supply	380V/50hz, 3phase
Power	2kw
Size	1400×1000×1650mm
