

HONGREAT®

Test Tube Filling Machine

Test Tube Filling Machine is used for clot activator BCA dosing spraying for blood collection tube. It uses imported pinch valve with 10 nozzles for effective, even spraying, and there is automatic cleaning device for the nozzles, easy and time-saving for maintaining. This machine is equipped with magnetic stirrer and refined atomizing nozzles, which can provide you more stable and quality working performance.

Features

Test Tube Filling Machine features its one bottom start, very easy to operate. This machine achieves perfect automation with only 3-5 workers are required for the whole machine operation. With the processing capacity of 10000pcs/h, Test Tube Filling Machine is suitable for BCA clot activator coating for blood collection tube. If you are interested, please feel free to contact us!

Product Information

- Production capacity: 10,000pcs/h
- Tube size: Ø13*75mm; Ø13*100mm; Ø16*100mm
- Power: 1KW/AC220V
- Overall dimension: 800×1100×1500mm (L*W*H)
- Air consumption: 0.2 m³/min
- Applicable Industries: Manufacturing Plant
- After Warranty Service: Video technical support, Online support, Spare parts
- Application: MEDICAL blood collection tube manufacturing machine
- Packaging Type: case
- Packaging Material: Plywood
- Automatic Grade: Automatic
- Driven Type: Electric
- Voltage: 380V
