

PZN-60E Automatic Tube Filling and Sealing Machine with Feeding

Plastic composite tubes and aluminum plastic composite tubes. This machine can be linked with automatic cartoning machine, automatic heat shrink packaging machine, automatic casing machine and other equipment.

Features and Parameters:

1. Operation speed: 60pcs/min(Max)
2. Filling volume: 5-250ml
3. Filling precision: $\leq \pm 1\%$
4. Suitable tube length: 50-210mm
5. Suitable tube diameter: $\phi 13-50\text{mm}$
6. Whole Machine: 1780x850x1980mm
7. Weight: 860kg
8. Standard configuration: obliquely hanging type automatic lining-up tube feeding storehouse.
9. Standard configuration: saddle folding and sealing device, which can realize.
10. Three-side and four-side folding through adjustment.
11. Optional: jacket and barrel heat preservation device
12. Optional: blending device inside the barrel.
13. Optional: automatically controlled material feeding device(pupm)
14. Optional: Finished tube conveyor.
