

Vertical Form Fill Seal Machines TWJB

The TWJB is an ideal model, combining both "made in Japan" quality with affordability. Designed with the aim of holding costs down, the high-performance model of the TWJB, which comes factory installed with major functions, can be used "as is" and achieve optimum cost performance. This intermittent model can produce 100 bag/min, sealing quality is secured by servo-driven 2-link end-seal heater system and smooth film feeding by adopting vacuum chamber type film tensioning unit. In case of usage by combination with our FRJB Auger filling machine, the operation can be controlled by one integrated control panel.

Specifications:

Bag Size Range	Bag Width	50 - 200mm
	Bag Length	50 - 300mm
Packaging Speed	Max. 100bpm	
Machine Dimensions	W 1121 x D 1939 x H 1413 mm	
Machine Weight	Approx. 620 kg
