

## Vertical Type Packing Machine (Special Bag) – CE-150L/VFM-S

### Features:

- Measuring system adopt screw measuring system, which is used to adjust material measuring during operation of the machine.
- Adopt PLC and touchable screen, Chinese and English surface.
- Use double heating tubes to guarantee stable temperature and perfect sealing surface, intelligent temperature controller, and stable color mark tracking system, increase the cutting precision.
- Independent temperature control system, accuracy up to  $\pm 1^{\circ}\text{C}$ , which makes it possible to use various packaging film.
- All the work of bag making, measuring, filling, sealing, cutting, counting, heat-printing codes can be done automatically.
- Closed frame construction, made of stainless steel 304.
- Environmental, low noise and clean working area.

### Technical Parameters:

Model	CE-150L/VFM-S
Brand	FULLWELL
Packing speed	25-70 bag/minute
Measuring range	10-100ml
Voltage power	220v, 50Hz, 2Kw
Machine Weight	350kgs
Package dimension	950 x 850 x 1000mm
