

## *GTI-G series Glass Bottle IV Solution Filling Stoppering Capping Labeling Production Line*

This machine is mainly used for dropping cap, pressing cap and rolling screw cap (anti-theft rolling) after the plug of large infusion bottle.

### **Performance characteristics:**

- A. the use of large capacity electromagnetic oscillation bucket cover, according to the need to be equipped with automatic stopper cap hopper, reduce the labor intensity of feeding, fast cover feeding speed;
- B. rolling cap is equipped with automatic positioning device, can automatically find the bottle mouth, after dropping the cap, pressing the cap is regular, three knife rolling cap, good sealing quality;
- C. continuous bottle in and out, smooth operation, high production efficiency;
- D. double frequency conversion control, stepless variable speed. Rolling knife rotation to achieve soft start, mechanical impact is small, low bottle breaking rate, long service life;
- E. cover rolling machine is equipped with the latest type of dust suction device with patented technology, in line with the requirements of the new GMP, can absorb the aluminum scrap produced when rolling cover, and then centralized discharge.

**Technical Parameters:**

<b>Model</b>	<b>GTI-G6</b>	<b>GTI-G10</b>	<b>GTI-G16</b>	<b>GTI-G20</b>
Application specification	50ml,100ml,250ml,500ml			
Production capacity	120 bottles/min	200 bottles/min	300 bottles/min	420 bottles/min
Capping head	6	10	16	20
Electric capacity(KW)	5.75KW	5.75KW	6.45KW	5.5KW(without capping motor)
Overall size L*W*H mm	1835x1145x2050	1875x1160x2050	2124x1410x2050	2558x1660x2050
