

Aesus – Eco Panel (Front & Back) Labeller

The Aesus Eco Panel labeller has the same powerful Servo label applicator head as their higher-end models but eliminates many bells and whistles to give a cost effective automatic front and back labeller.

Features:

- No bulky control box or heavy interconnecting leads;
- Compact design quick release core holders and take-up roll;
- Built-in user friendly display screen;
- Custom Servo control designed perfectly for label applications with appropriate ramp-up and ramp-down;
- Built-in encoder follower circuits to precisely follow a conveyor or rotary turret drives;
- Variable speeds and adjustable gear ratios 'start delays', 'stop delays', 'missing label' advances, shift registers;
- Patented inductive label sensor that can mount right at the dispense blade to handle even Mylar labels, without the need to play with photo electrics which can dust up;
- Patented moving dispensing beak to ensure that difficult labels are precisely dispensed;
- Hook-ups for printers, barcode readers, print engines;
- Many bolt-on standard options are available to handle the most demanding challenges.

Features:

- Speeds of over 100 per minute; includes 7 foot long stainless steel conveyor, 14 inch wrap belt, framed stainless stand ;
- Rugged and accurate label dispense head;
- Optional prism roller system for highly accurate wrap labelling;
- Fully adjustable hold-down belt;
- No proprietary components;
- Maintenance-free servo motors;
- Stainless steel and anodized aluminium construction.
