

## FD-SSA Semi-Automatic Capping Machine

- This machine is a semi-automatic capping machine. It is especially suitable for metal anti-theft caps, easy-open caps, aluminum caps and nozzle cap sealing and threading of various glass, plastic and polyester bottle mouths.
- It is suitable for one of the necessary production equipment's for various production and packaging production plants such as beverages, chemicals, drinks, medicines, and cosmetics.
- The machine has the advantages of simple structure, stable lock quality, high production efficiency, convenient adjustment and simple maintenance.
- This semi-automatic capping machine can be mainly used in the work of metal, plastic anti-theft cap, screw cap, aluminum easy-pull cap thread, cap and cap.

### Technical Parameters

Model	Power	Working mode	Lifting mode	Machine type	Workbench (bottom case) Material
FD-SSA	AC220V 5A 50/60HZ	Hand-held mode of electric lock (sealing) cover object.	The average speed is continuously raised and lowered.	Falling ground.	stainless steel 304# material.

Lock (spin) cover diameter (mm)	Applicable bottle height (mm)	Machine size (mm)	Machine net weight (kg)	Production capacity (pc/min)
approx Ø30mm.	according to the sample.	455mm × 680mm × 1560mm.	about 111 kg.	Depending on the worker's labor speed.
