

VD-2_FOT Automatic Filling Machine

This automatic filler is designed to fill liquid, semi liquid, viscous (paste) and products with particles into the glass and jars & bottles.

TECHNICAL SPECIFICATIONS

- * This filler is a mono block system including the filling, cap sorting and capping. It gives economical solutions to the middle sized companies.
- * VD2_OT consists of 3 parts. Filling part, cap sorting part and capping part.
- * Works with volumetric piston system.
- * Works with oil-free pneumatic system.
- * Touch Panel Control System
- * Rotary cap sorting, index table system
- * PLC Stainless Steel control system

MATERIALS USED ON THE FILLER

* The parts that contact with the product are 316 L stainless steel. The other parts are aluminums and 304 L stainless steel.

OPERATING TEMPERATURE: +5 ° /+90 °

FILLING ACCURACY: \pm %1

Model	Minimum Filling Range (ml)	Maximum Filling Range (ml)	Filling Pistons	Capacity (Packages / Hour)
VD 1000-2_FOT	100 ml	1000 ml	2	1200 Packages / Hour
VD 2000-2_FOT	200 ml	2000 ml	2	1000 Packages / Hour
VD 5000-2_FOT	1000 ml	5000 ml	2	840 Packages / Hour
