

RSJ-800 Shrink Packing Machine

RSJ-800 type thermal contraction packaging machine is mainly applied to all varieties of packaging formation of such industries as pharmacy, food, soft drink, daily chemistry etc. Especially it can replace the middle packaging box of pharmacy industry, with the prominent effect of saving the product cost. And it can combine bottle-packaging production line, box-packaged machine to form the linked production line, and also it can combine the production line of other industry to manufacture.

Features:

- 1) Adopt PLC programmed automatic circular movement control, which has the function of feeding, stowing, film-wrapping, sealing and cutting, thermal contraction and cooling.
- 2) All the important parts are adopted with high standard kits, and the pneumatic components PLC and terminal frequency converter etc. electric appliances are all adopted with internationally famous brand.
- 3) The production speed can be regulated to reach the best packaging effect. After the packaging, the appearance of product is transparent and beautiful.
- 3) The height can be regulated in convenience of the anterior and posterior working procedure.
- 4) Contrasting with the same kind of product, it can save 5-10% film material and 50% heat energy. Adopt PE (Low density polythene resin) non-toxic contraction packaging film, with good anti-welding performance.
- 5) Multi-spot buttons, equipped LCD display is convenient to operate.
- 6) Have the function of safety protection.
- 7) Contrasting with the cost adopting original carton packaging, it can save 30-50%.
- 8) The opening of the packaged things is more convenient. Fully automatic package production equipment integration the mechanism and electrics into one.

Main technical parameters:

Production Capacity	15 bags/min (according to the size packaged things)
The Size of Finished Package	Min: 100;Á80;Á60mm Max: 300;Á200;Á200mm
Work Pressure	0.6-0.7 Mpa
Air Consumption	180 L/min
Motor Power	10 KW
Noise	ˆQ65 dB(A)
Overall dimensions	2880;Á1130;Á1700mm
Weight	600kg
