

BGF series glass bottle beer rinsing filling capping 3 in 1 mono block

The machine is mainly used in beer filling operations. The machine will rinsing, filling and capping functions together in one body, the whole process is automatic. The machine adopt the international new design beer filling valve for packaging beer in glass bottle, by adopting advanced technologies both at home and abroad to make the filling is faster and more stable, so this machine compared with the same specifications of the machine with higher yields, greater efficiency. Mean while, we are able to provide complete high-efficiency beer filling production line for the beer breweries.

Technical parameters

Model:	BGF14-12-4	BGF16-16-6	BGF18-18-6	BGF24-24-8	BGF32-32-10	BGF40-40-12
Capacity:	2000-3000	4000-5000	4000-5000	5000-6000	6000-8000	8000-1000
Bottle type:	Glass bottle					
PET bottle: (mm)	(Bottle Diameter): ϕ 50- ϕ 90mm (Height):150-330mm					
Cap:	Crown cap					
Filling temperature: (°C)	2-7					
Rinsing pressure: (Mpa)	$\geq 0.06\text{Mpa} \leq 0.2\text{Mpa}$					
Motor power: (kw)	3	3	3.5	5.5	7	9
Overall size: (mm)	1850*1700* 2100	2100*1800* 2350	2400*2150* 2350	2800*2200* 2800	3800*2800* 2800	4600*3000* 2800
Weight: (kg)	2500	3000	3500	4500	6500	7500
