

MZB Series of Wrap Around Case Packer

Wrap around case packer is a piece of packaging equipment which automatically packed products into cases from a flat cardboard and some bottles. It can pack containers in different materials such as PET bottles or glass bottles, and different shapes such as round, square, oval, triangle etc.

Wrap Around Case Packer is a full automatic machine to pack bottles, cans and jars into cartons. It keeps stability in continuous linear operation and fits medium and high speed production line.

Technical advantages:

1. Low investment, quick return
2. Advanced device layout
3. International general accessories
4. Lower waste, higher productivity
5. Easy operation, rapid replacement
6. User friendly interface
7. Complete after-sales service

Working principle:

First, the feeding chain sends products to bottle grouping area where they are arranged in order for being packed. Second, the flat cardboards are put into grouped products after being conveyed to the Synchronous transmission area. Finally, cardboards and products are conveyed together for the rest steps to be packed and sealed.

Application:

Be widely used in packaging fragile containers such as beer bottles and soft PET bottles.

Equipment models:

Model	WSD-MZB451	WSD-MZB651	WSD-MZB851
Capacity (packs/min.)	45	60	80
Bottle grouping mode	Servo-type	Servo-type	Servo-type
Dimension	11600*2000*2650mm	15000*5000*2650mm	16000*5000*2650mm
Feeding belt length	3620mm	3620mm	3620mm
Min. Carton size	200*170*90	200*170*90mm	200*170*90mm
Max. Carton size	480*300*300mm	480*300*300mm	480*300*300mm
Bottle diameter	55-100mm	55-100mm	55-100mm
Bottle height	90-300mm	90-300mm	90-300mm
