

SQG Series Sterilization Cooling Drying Machine

The machine is used to process the technical program of sterilization, cooling and drying for foods as Jelly & Fermented Drink just came out after filling and sealing. It can be formed a production line with the series machines of CFD, CFA and CFS models. It has two systems of heating way, the steam heating and the electric heating. The whole machine is made of stainless steel, with an infinitely variable speeds feeding-chain. It has temperature indicator. The machine is beautiful in looking and durable in running.

Model	Capacity	Dimension	Weight
SQG-900	100KG/hr.	18000X1150X1700mm	2800 kgs
SQG-1250	200KG/hr.	26000X1450X1700mm	4000 kgs

型号	生产能力	外型尺寸	重量
SQG-900	100公斤/小时	18000X1150X1700mm	約2800公斤
SQG-1250	200公斤/小时	26000X1450X1700mm	約4000公斤
