

QGF Series Bottled Water Filling Machine

QGF type bottled production line specialize produce 3 gallons and 5 gallons bottled water. The machine with all the function—washing, filling, screwing, it is an ideal equipment for producing mineral water, distilled water, pure water. All the machine is made of stainless steel, anticorrosive, easy to clear. The main electrical elements use the SIEMENS, OMRON. Carrier gas system uses the Air TAC. The machine has small and exquisite structure, occupy a little space in the working room, high efficient working, stable and reliable, high automation. All the operation just needs 2 people.

TECHNICAL SPECIFICATIONS

Type	QGF-80	QGF-120	QGF-240
number of filling thread	1	1	2
Barrel space standard(mm)	Φ276×490		
Production capacity(barrel/h)	80-100	120	240
Pressure of air supply source	0.4-0.6Mpa		
Gas consumption	0.6	0.6	0.8
Total power KW	1.38	1.75	2.1
Voltage rating	380V/50HZ		
Overall dimension(mm)	3100×650×1550	3190×650×1550	3100×900×1650
Weight	680	800	800
Filling volume	18.9 L		

Type	QGF-300	QGF-450	QGF-600
number of filling thread	2	3	4
Barrel space standard(mm)	Φ276×490		
Production capacity(barrel/h)	300	450	600
Pressure of air supply source	0.4-0.6Mpa		
Gas consumption	0.9	1.8	2.5
Total power KW	3.0	3.8	6
Voltage rating	380V/50HZ		
Overall dimension(mm)	3100×900×1650	3550×1100×1800	3800×1100×1800
Weight	1000	1600	2300
Filling volume	18.9 L
