

# TODAY MACHINE

Simple & Responsible Since 2001

## Dry Grinder Machine FG-series

Chili, Deer Antler, Sugar, rice, Walnut, Dried fruit, Star anise, Corn kernels, Bean, Sesame, Jujube, Soil, Seed, Herb, Leaf ...

### Feature:

This machine use high speed of operation activities fluted disc and fixed fluted disc of relative motion between shattered by the tooth things impact, shear and friction and material each other collision comprehensive effect to achieve the purpose of grinding material. This machine has simple structure, smooth operation, low noise, good crushing effect. After grinding material directly from the grinding chamber discharge. The particle size, but through the selection of different aperture screen to achieve.

The universal crusher can also be equipped with a water cooling device according to the special use requirements of the user and the special physical and chemical properties of the material to be crushed. For example, the pulverized material has a lower melting point, a lower ignition point, is more susceptible to heat and is sticky, and is liable to cause a reduction in pulverization effect or failure to pulverize, or even cause burning, explosion, etc., which is necessary to add to the universal pulverize equipment. Water cooling and cooling device.

### Technical parameter:

Model	Option	Capacity	Main shaft speed	Fineness	Power	Weight	Size
		(kg/h)	(round/min)	(mesh)	(kw)	(kg)	L*W*H(mm)
FG-180	220V380V	20-100	4200 rpm	10-120	2.2	70	700*480*1000
FG-250	380V	50-200	4200 rpm	10-120	5.5	180	750*600*1350
FG-320	380V	150-300	4200 rpm	10-120	7.5	250	850*700*1450
FG-350	380V	200-550	4200 rpm	10-120	11	400	950*800*1650
FG-400	380V	300-800	4200 rpm	10-120	15	700	1050*1000*2100
