

MBXG-200 Auto Capping Machine

Designed for capping bottles with height 50 – 200 mm (can be customized) and diameter 35 – 70 mm (can be customized). Equipped with 1 capping head. To operate the machine needs compressed air supply with a pressure of 0.6 MPa.

Technical parameters:

Material:	Stainless steel
Qty of capping head:	1
Capping speed:	50-60pcs/min
Capping height:	50-200mm (shall be customized if out of this range)
Dia. of applicable bottle type:	35-70mm(shall be customized if out of this range)
Working voltage:	AC220V 50/60Hz(according to customer's need)
Electricity power:	500W
Air source:	0.6MPa
Weight:	200KG
