

Automatic Beer Filling Machine BGF-series

Beer Filling Machine adopts advanced “Secondary Vacuum and High Pressure Bubble Injection” technology to decrease oxygen content and improve the taste of beer; with precise pressure control and automatic defective bottle detection function, final product of Beer Filling Machine realizes perfect quality at all times.

Characteristics of Used Beer Brewing Equipment Plant:

1. Using the wind sent access and move wheel in the bottle directly connected technology; canceled screw and conveyor chains, this enable the change the bottle-shaped become easier.
2. Bottles transmission adopt clip bottleneck technology, bottle-shaped transform not need to adjust the equipment level, only change related the curved plate, wheel and nylon parts is enough..
3. The specially designed stainless steel bottle washing machine clip is solid and durable, no touch with the screw location of bottle mouth to avoid secondary pollution.
4. High-speed large gravity flow valve filling valve, filling fast, filling accurate and no liquid lose.
5. Spiraling decline when output bottle, transform bottle shape no need to adjust the height of conveyor chains.
6. Host adopt advanced PLC automatic control technology, the key electrical components from famous company such as Japan's Mitsubishi, France Schneider, OMRON

Technical Parameters:

Model:	BGF12/6	BGF18/6	BGF24/8	BGF32/10
Production Capacity(500ml)(b/h)	1000-1200	2000-3000	4000-5000	6000-8000
Total Power(kw)	1.5	1.5	3.75	5.6
