8-8-3 Fully-Auto Glass Bottle Filling Machine

This machine is the latest design of the beer filling machine 3 in 1 type. It adopts external filling valves, all filling valves were hung on outside of the beer tank, which has no contact with the beer inside. This can guarantee the beer won't have any bacteria infections reliable than the original design.

Technical Parameters:

Capacity	800-1000BPH
Overall size	1850*1600*2500mm
Material	AISI304 stainless steel
Filling method	isobaric filling
