

## *SKP-6 Six Lanes K Cup Coffee Capsule Packaging Machine*

### **Optional function**

1. UV light: Choose UV lamp, UV sterilization to make sure food safety
2. Anti-static device: Fresh coffee powder generates static easily; use this device to improve filling accuracy
3. Flavor adding: Micro adding flavor liquid into capsules, easy to change the taste of coffee
4. Remote control: as long as use internet line to connect with machine, we can control customer's machine in our factory when machine meet failure
5. Discharge station: Swing manipulator output finished capsules to outside container

## Technical Parameters:

Machine Parts	All the product contact parts are stainless steel AISI 304. The machine is constructed of stainless steel, anodized aluminum and plastic
Certification	CE, FDA, CSA, ISO 9001,SGS
Product Material	Ground coffee,milk,tea powder
Sealing Style	Die-cutting aluminum foil or Roll film
Production Capacity	240-300 capsules per minute
Coffee Feeding	Servo driven auger filler
Filling Weight	10-15g
Dosage &nbsp;Accuracy	±0.15g
Power	3 phase 220/380V 50/60HZ 13KW
Air Pressure	0.6Mpa-0.8Mpa
Air Consumption	0.6m <sup>3</sup> / minute
Weight	1700Kg
Dimension	4800mmX2500mmX2700mm
Drawing	Attached below
