

Vertical Turmeric Powder Packing Machine LG-500

Turmeric powder packing machine is widely used for packing turmeric powder, pepper powder and other powder products.

In view of the dispersion of packaged powder products, two feeding methods are set up in turmeric powder packing machine: manual feeding and automatic feeding. First of all, automatic feeding is the best choice for customers, because compared with manual feeding, automatic feeding is more convenient and fast, which can greatly save manpower and operation time. Second, hand feeding. Manual feeding also has its own advantages, such as making the packaging process clearer and more suitable for customers with customized packaging needs. Customers can choose different feeding methods to connect with the original production line according to different production purposes, so as to achieve the production purpose. And the price of the turmeric powder packing machine is very favorable.

Advantages Of Turmeric Powder Packing Machine

1. In the aspect of feeding, the machine can realize multi-level feeding operation. The multi-stage feeding system of the machine can make the feeding process safer and greatly reduce the accidents caused by improper feeding operation.
2. Turmeric powder packing machine has simple structure, more convenient operation, more convenient to adjust and set up the machine.
3. When changing products of different sizes, our machines only change molds, which can save time and energy, save production time more effectively and improve production efficiency.
4. The control system of our machine adopts high quality electrical components, which makes the operation safer.
5. Turmeric powder packing machine equipped with two systems: automatic detection and automatic alarm system, the two systems can timely detect the operator's error, and can timely alarm, can effectively reduce the accident.

6. Turmeric powder packing machine is a fully automatic machine, which can effectively save the operator's time and energy and greatly improve the production efficiency.

Technical Data:

Model	LG-500
Bag Size Making	L: 40-320mm W: 40-220mm
Thickness of Packing Film	0.03-0.07mm
Diameter of Rolling Paper	=<400
Packing Speed	40-65 Bags/min
Power	1.8KW/220V
Measure Range	200-1000ML
Weight	500kg
Dimensions	950*1200*1900mm
