## SPM-T100 Filter Tea Bag with Envelope Packing Machine

Our tea packing machine SPM-T100 is designed to packing filter tea bag with Envelope outer bag. The tea bag is formed in the first station and the outer envelope is simultaneously formed in the second station. The formed tea bag is then automatically inserted into the outer envelope and the outer envelope is sealed. This machine is suitable to pack Tea, Herbal products, Coffee.

### Features:

- All components in direct contact with the product are made of stainless standards or food sanitary parts.
- Motorized adjustment of measuring cups.
- This machine is designed for three sides sealing packing.
- Outer envelope intermittent sealing
- Assembly with inbuilt batch cutting

### Specifications:

Model	SPM-T100
