

*Jam Jelly Filling Sealing Machine TPP-4J(1*4)*

Jam jelly filling sealing machine have different specification sealing pump. We can design different machines as per client's requirements. It is suitable for filling and sealing any level drink and pasty products in different shapes and capability vessels. For example drink, water, milk, yogurt and so on.

Rotary cup filling sealing machine is suitable for kinds of shapes of plastic cups filling and sealing. Its packed product is very beautiful and top grade.

This rotary cup filling sealing machine is fully automatic from cup sending, filling, sealing, film collecting and cup discharging.

This rotary cup filling sealing machine is multi-functional model. Its machine frame is made of carbon steel 45#, which is coated by stainless steel metal plate. Other parts of machine are all made of stainless steel 304.

This cup filling sealing machine series is widely used in various kinds of plastic cup for liquid filling and sealing.

Technical Parameters:

Model	TPP-4J(1*4)
Capacity	3500-3800cups/hour
Filling head	4 heads (1,2,8,16 head welcome to consult)
Voltage	380V/50HZ
Filling method	Plug filling(leak-proof)
Filling material	Liquid or semi-liquid
Filling quantity	30-300 g adjustable
Filling accuracy	2-3 g
Power	3.5KW
Air consumption	0.65m3/m
Dimension	3000*800*1900 mm
Weight	1200KG
Temperature control	0-400°C
