

## *Blow Molding Machine HY-B-II*

Semi automatic bottle blowing machine for PET PC bottle blowing the various shapes, volume from 50 ml to 2000 ml, the bottle blowing machine is widely used for blowing mineral water bottles, soda bottles, cosmetic bottles and bottles.

The double crank arm - locking, locking stable, fast running speed, using far infrared rotary oven, uniform heating.

The gas path system is divided into two parts of action and blowing, to meet the different pressure of the blowing action, demand, and can provide a stable pressure for blowing a large volume bottle shaped.

- this machine is equipped with muffler and components of refueling device.
- this machine is divided into dynamic and automatic mode two.
- this machine has the advantages of small volume, less investment, easy and safe operation.

**Technical Parameters:**

<b>Name</b>	<b>Company</b>	<b>Technical parameter</b>
capacity	L	One point five
yield	PCS/Hr	One thousand and five hundred
The maximum height of the bottle	MM	Three hundred and twenty
The maximum diameter of the bottle	MM	One hundred and twenty
The maximum diameter of the bottle mouth	MM	Seventy-five
Number of cavities		A two
Operating pressure	MPA	Less than or equal to 1.2
Blowing air pressure	MPA	Three
Power Consumption	KW	Sixteen
Host voltage frequency	V	220/50/60HZ
Oven voltage frequency	V	380/50/60HZ
Host size (length * width * height)	MM	1830*580*1800
The size (length * width * height)	MM	1450*700*1350
Host weight (2 sets)	KG	800*2
