

Vaseline Filling and Cooling Line

Brief Introduction:

- This filling machine is special made for filling product like wax, vaseline etc.
- Piston type, filling system is driven by servo motor which is accurate on the filling volume and convenient of filling volume setting.
- The whole filling system: product hopper, dosing system, filling nozzle all are heat able for maintain product temperature.
- And product contact parts of the machine is made up of 304 stainless steel (316 stainless steel is available for optional)

Can connect with cooling tunnel after filling to cool down the product in the bottle immediately.

Parameter:

Filling head	6-head/ 8-head/10-head/12-head
Filling range	50-250ML
Filling accuracy	±1%
Air Pressure	0.6-0.8MPa
Conveyor	POM conveyor Chain, width 82mm, speed 0-15 meters/min
Power	3KW/AC220V/380V 50HZ
Hopper	50L with level sensor
Whole product contact parts is with heating function.
