

Chili Sauce Packer GG-60C

Characteristics of Automatic Tomato Paste Packing Machine

- Bucket chain conveyor is convenient on feeding or multi-material packing;
- This machine is featured with compact structure, stable, easy operate, convenient on repairing.
- This machine adopts photocell control system, visual and understandable, accurate positioning, nice looking.
- This machine can finish automatically all processes, from measuring, filling, bag making, date-printing and finished productions conveyance.
- Measure methods: gear filling machine, sealing form: 3-side, four-side sealing
- The use of advanced PLC control system, fault automatic and the alarm diagnosis stop, automatic shows number of packages, convenient to statistics the workload
- The stepping motor stepless speed regulation, color code tracking device to cooperate to use, can obtain perfect trademark logo, intelligent temperature controller adjust sealing temperature, and reliable performance, easy to operate
- With automatic feeding, counting, heating, adjustable packaging speed, fault display
- Unique packing and sealing technology make the sealing perfect, substance.

Application of Automatic Tomato Ketchup Packaging Machine

Suitable for automatic packaging of liquid and viscous fluid state. Such as: fruit jam ,Shampoo ,shower gel ,skin lotion, tooth paste ,cosmetic cream, mayonnaise, edible oil, soy sauce, vinegar ,ketchup, spaghetti sauce etc..

Technical Parameters:

Item No.	GG-60C
Measuring Range	1-35ml
Bag size(mm)	L:50-110 W:70-160
Packing speed	25-60 bag / min
Power	220V/380V/1KW
Sealed bags	3 sides
Weight	230KG
Machine size	(L)625*(W)750* (H)1550mm
