

ZX-C-02B Double Scale Particle Weighing Machine

Quantitative packaging of pesticides, fertilizers, veterinary drugs, feed, premix, additives, laundry powder, salt, monosodium glutamate, chicken essence, sugar, seeds, rice and other granular and powdery materials.

Performance Characteristics

- PLC control, Chinese touch screen operation, only need to input weight parameters, the system can automatically calculate fast and slow additions, and can automatically track and correct errors.;
- Electronic scales can directly measure and load more accurately;
- PLC control, strong anti-interference;
- Four scales are more efficient in measuring;
- All stainless steel structure;
- Artificial bagging, photoelectric induction, automatic measurement.

Technical Parameters:

Packaging Specification	5g-6kg
Packing speed	1200-1800 bags/hour
Packaging accuracy	<0.3%
Power supply	AC220V 50Hz
Whole machine power	500w
Weight of whole machine	120Kg
Size	710 * 840 * 1800mm
