

NJP-6800/7500 High Speed Automatic Capsule Filling Machine

Machine Advantages:

Consistent with national energy-saving emission reduction requirements, ultra-low power consumption.

1. Excellent cost performance ratio and flexible machine set up
2. Production of ultra-high capacity, save a lot of labor costs
3. Suitable for mass production of single product
4. Segment cleaning with intensified segment cleaning, which increased the production capacity of equipment.
5. Control unit and main machine is separated. It can put the machine according to production room. Which reduces the interference of vibration of the main machine to control unit.
6. Optional printing system for some production data.
7. Touch screen is a particularly operator-friendly feature.

Main Technical Parameters:

No.	Data	Model and Specification	
		NJP-6800	NJP-7500
1	Max output (Capsules/min)	6800	7500
2	No of segment bores (four lines)	48	52
3	Suitable capsule size	00#-5#	00#-5#
4	Filling precision	±3%	±3%
5	Noise	≤78dB	≤78dB
6	Total power	11 kw	12 kw
7	Overall dimension (L*W*H)	1738*1226*2000mm	1738*1226*2000mm
8	Net weight	3000 kg	3000 kg
