

Laboratory Kneader Type

Laboratory Kneader is operating on the Z blade principal. It consists of two Z-shaped mixing blades rotating towards each other at different speeds which cut down substantially the required batch mixing time. The bowl and Z mixing blades are made of stainless steel. The bowl has an acrylic cover which allows visual observation of mixing and the above cover is having electromagnetic safety switch. The Laboratory Kneader is suitable for screwing on all main drive units.

Technical Specifications:

Gross Capacity	5 L
Working Capacity	3.5 to 4 L
Dimension in mm	520 x 230 x 450
Net weight in kg	33
Gross weight in kg.	34
