

Six weathers noodle bundling and packing machine

Contains:

1. Packing machine: one set
2. Conveyor line: one set
3. Mixing device: one set
4. Heaping device: one set
5. Accelerating device: one set
6. Blank conveyor line: three sets
7. Hoist engine: eight sets
8. Bundling line: eight sets
9. Weighing machine: eight sets

Application: automatically finish the process of weighting, outputting, filling and sealed packing of the Spaghetti and other noodle

Advantage

1. Our packing machine use high-quality imported components, Chinese characters supporting touch screen, PLC, which is easy to operate. Machine speed is controlled by inverter and can work synchronized production with other system. With anti-theft device.
2. Adopted latest technology and massif design. Long operating life
3. Weighting machine use Chinese characters supporting touch screen, PLC, which make the packing speed faster and more accurate. It is the perfect substitute products of the traditional packing machine

Benifi analysis

1. Spare the manpower, Improve productivity: daily outputting 30t/5 person
2. Saving material resource.
3. Reduce the chance of the long-term contact of human body or still can be opposite through food healthy generation harm.
