

FGJ-4 Automatic 4 Heads Rotary Can Seamer

This kind of machine is mainly used for easy pull cans made of tinfoil, aluminum alloy can or PET cans capper, It is very good ideal facility for canned food plant, beverage plant, wine plant, etc. It has automatic stop device in case of problems like no cap for can, no can no cap, can block and other problems.

Feature:

1. This machine has a compact structure, perfect control system, easy to operate and highly automated.
2. The main electric components, frequency, photoelectric switch, proximity switch, electric control valves all adopt imported components, which can ensure the quality performance.
3. The control system has many functions, such as control producing speed, cap shortage detection, can block automatic stop and production counting etc.
4. Big bearing with long use life.
5. Double sealing device assure separate adjustment and control, with good sealing effect.
6. Sealing direction is anticlockwise, cans outlet automatically as per its rotation direction, no damage to can body and no can block happen.

Technical Parameter

Model	FGJ-4
Seaming heads	4
Production speed	100-200 cans/min
Suitable can height	39-160mm
Suitable can diameter	φ52.3~φ99mm
Motor power	7.5Kw
Weight	2000Kg
Overall dimension	1600×1200×1900mm
