

## *Straight Line Type Gas Washing Machine HHQXL*

Suitable for pharmaceutical, daily chemical, food and other industries, to wash or wash with oil-free air. It is widely used in glass, plastic, aluminum and other materials such as bottles or listening containers. Uses a hollow needle and a vacuum to breathe in the compressed air, and sucks away the particles of plastic particles that are attached to the inner wall of the bottle. According to the process and the material condition can choose the bottle turnover mechanism and the electrostatic device.

### **Technical Parameters:**

Bottles applicability	2-500ml(Special specifications can be customized)
Capacity	120bottle/min
Gas consumption	10m <sup>3</sup> /h
Power consumption	2KW
Voltage	220V 50HZ
