

XT-LP Full-Automatic Bottle Unscrambler

Plastic bottles (round or square bottles) and other containers with impact resistance can be unscrambled automatically and outputted in order by this full-automatic bottle unscrambler. This machine can be matched with bottle-washing machine, filling and cap-screwing machine and labeling machine to run with production line, widely used in medicine, food and chemical industries. As a choice, bottle- storing and automatic bottle- supplementing mechanisms could be matched to improve the degree of automation.

1. Complete machine is made from stainless steel and conforms to GMP.
2. High bottle unscrambling efficiency; high and adjustable bottle outputting speed; simple operation; easy to maintain.
3. This machine will shut down automatically when bottles are full on back-end and start up when they are lacking.

Specifications:

Model	XT-LP
Production capacity	0~120 bottles / min
Adapt to the bottle type	Diameter Φ40-90 mm (H)40-100mm
Applicable bottle height	40-100mm
Bottle Material	All kinds of plastic bottles
Power Supply	220V 50~60HZ 1500W
Total weight	380KG
Machine Size	2500*1120*1500mm
